Haven't had a chance to look at it yet. David let's have a call soon to discuss.

Bill please find attached preliminary data from the site.

Attached are a kmz and a jpeg. We have the full GIS if interested.

We have a gps fault on the scanner that we are looking into. I am having them deliver the raw data so we can manually give you an thermal image. It will take about 1.5 hours. to complete.

No detections of any vapors leaving the site. I expect to have the aircraft ready (fixed gps) by 1230.

Please let me know if you have any questions.
